Helper methods

Helper methods

unwrap

will return the data if it’s available or panic! of it’s not

```
File::open("example.txt").unwrap();
```

Helper methods

unwrap

will return the data if it’s available or panic! of it’s not

```
File::open("example.txt").unwrap();
```

expect

similar to unwrap but allows us to set a custom error message

```
File::open("example.txt").expect(“Unable to open file”);
```
